Running a Hostel Shouldn't Feel Like Chaos

Most hostel owners still rely on manual registers, Excel sheets and WhatsApp groups to manage their operations. This leads to errors, delayed rent collection, no visibility on vacant beds, and staff wasting time on repetitive tasks. HostixOS changes all of that.

Common Challenges

Manual registers & Excel sheets causing errors in rent and booking records

Chasing tenants for rent every month via calls and messages

No real-time visibility on occupancy, vacant beds or revenue

Staff spending hours on paperwork instead of growing the business

With HostixOS

Digitizes everything — rooms, beds, students, bookings, rent and finances

Automated rent reminders via SMS, WhatsApp & email + online payment via Razorpay

Live occupancy map with color-coded bed status + real-time analytics

Full automation — bookings, receipts, invoices, reports and staff tasks

Ready to Digitize Your Hostel?
